

Performance evaluation

Julia Svegin has during three years, 2018-2020, been a student of upper secondary school at Polhemskolan in Lund, Sweden. She accomplished the Natural Science Program in where she studied two courses in chemistry, beside other subjects like physics, biology and mathematics.

I have known Julia for three years in my capacity as a Lecturer in chemistry and mathematics. Julia has been my student in both courses of chemistry (Ke1 and Ke2). I find Julia ambitious, quick at learning and responsible for her studies. My rating is based on her work at lectures and laboratory but also on the written test.

I can therefore highly recommend Julia and I am convinced that she will be an excellent student. For additional information please feel free to contact me at +46-0729816394 or by email at Nitsa.Kiriakidou@lund.se

Sincerely,

*Nitsa Kiriakidou Kazemifar
Principal of the Natural Science program and
Lecturer in chemistry/mathematics at Polhemskolan Lund, Sweden*
