

StorsjöGymnasiet

2023-06-02

To whom it may concern,

Kajsa Bergvall has asked me to write a letter of recommendation to accompany her application. I am the principal of the Social Science Program, at StorsjöGymnasiet in Östersund, Sweden.

It is with great pleasure I recommend Kajsa. She has attended this school for 3 years and graduated June 2023.

Kajsa has during High School had a busy schedule and extended courses for soccer, which she has taken great responsibility for, and she developed in many ways as a student and athlete during this time.

Kajsa's former teachers describe her as an ambitious and forward girl who always has a nice attitude. She always looked after her own development by being curious and always one of the top students involving all assignments.

One teacher describes her as mature, and she always performed great in her studies. She has shown a combination of ambition, patience, and high analytical ability. In addition, she is a wise and caring person who has taken a big responsibility to make things happen together with her classmates.

Another teacher portrays Kajsa as reliable, determined and she has very good leadership qualities. She is responsible and makes sure that things are done, and she also has an ability to spread her work ethic to others in the contexts in which she is involved. Beside her studies she worked extra as an assistant soccer coach for younger kids.

I strongly believe that Kajsa will be able to succeed in higher education. I wholeheartedly recommend her for studies abroad.

Kind regards

Margita Toftén, assistant principal, StorsjöGymnasiet.
