

Letter of recommendation

Enköping, Sweden 2023-02-10

To whom it may concern,

Since August 2021 I have been teaching Agnes Vilén in Mathematics and Physics at Westerlundska gymnasiet (upper secondary school). I have been working as a teacher at Westerlundska gymnasiet in Math och Physics for over 20 years and have a background as a researcher at Uppsala University. I also have a PHD in Astronomy.

Agnes is a dedicated and ambitious pupil; she is always doing her very best and is eager to learn. She has a high ability and her results have been at the upper scale of the grades.

Agnes is a friendly, trustworthy, and social person. She is hard working, balancing her intensive physical training for soccer with the work at school in a successful manner. She adopts easy to all kinds of social activities and different situations at school. She has a strong integrity and will to improve.

I warmly recommend Agnes for higher studies abroad. I am confident that she will reach success in her coming career, whatever that may be.

Sincerely yours

Jari Rönback

Westerlundska gymnasiet
