

My name is Per Hellqvist and I work as an registered teacher in geography, history and religious science in an upper secondary school in Östersund, Sweden (Wargentinskolan).

This year I have had the privilege to teach Ella Green (2005-10-04) in my class, both in geography and religious science. I can highly recommend Ella for higher studies abroad. Her personal qualities that I have observed during these ten months are as follows; First of all her ability of taking responsibility for her own growth and development as a student. She has received high marks overall and is very focused in the classroom of what is important at the specific moment. Beside this I have noticed that she has high status and enjoy high respect from her class mates. She respects given dead lines on her assignments and oral presentations and she always deliver high results on her individual test. Her positive attitude is very obvious when it comes to facing new situations and Ella contribute in many ways to a positive class room atmosphere. I therefore will highly recommend Ella for coming studies abroad. I am completely confident that she will deliver good study results and contribute to a positive atmosphere in her new environment.

Please, contact me if more information concerning Ella is required.

Best regards
